This HP service provides high-quality remote assistance and onsite support for your covered hardware, helping you to improve product uptime.

You have the flexibility to choose between different service-level options featuring different response times and coverage windows, as well as between several coverage periods to address your specific service needs.

**Service benefits**
- Improved system uptime
- Convenient onsite support
- Reliable response times

**Service feature highlights**
- Remote problem diagnosis and support
- Onsite hardware support
- Materials included
- Service-level options with different coverage windows and response times
- Work to completion
- Escalation management
- Access to electronic support information and services
- Electronic remote monitoring and support, standard configuration (for eligible products only)
Once the customer has placed a service request via a designated HP support telephone number, HP will work with the customer during the coverage window to isolate the hardware problem and to remotely troubleshoot, remedy, and resolve the problem with the customer. Prior to any onsite assistance, HP may initiate and perform remote diagnostics using electronic remote support tools (where available) to access covered products, or HP may use other means available to facilitate remote problem resolution.

Regardless of the customer’s coverage window, problems with covered hardware can be reported to the HP Response Center via telephone or electronically, as locally available, 24 hours a day, 7 days a week. HP will acknowledge the receipt of the service request and notify the local office at the next coverage window. HP retains the right to determine the final resolution of all reported problems. Onsite response times or call-to-repair times, as applicable, for service requests submitted electronically or outside of the coverage window may vary.

Onsite hardware support

For technical hardware issues that cannot, in HP’s judgment, be resolved remotely, an HP authorized representative will provide onsite technical support on covered hardware products to return them to operating condition. For certain printers, PCs, ProLiant servers, Intel® Pentium® and Xeon® processor-based servers, and networking and storage products, HP may, at its sole discretion, elect to replace such products in lieu of repairing them. Replacement products are new or equivalent to new in performance. Replaced products become the property of HP.

In addition, HP may install available engineering improvements to help the customer ensure proper operation of the hardware products and maintain compatibility with HP-supplied hardware replacement parts. At its sole discretion, HP may install any firmware updates that, in the opinion of HP, are required to return the covered product to operating condition or to maintain supportability by HP.

Materials

HP will provide HP-supported parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements. Replacement parts are new or equivalent to new in performance. Replaced parts become the property of HP.

Coverage window

The coverage window specifies the time during which the described services are delivered onsite or remotely. Service requests received outside this coverage window will be logged the next day for which the Customer has a service coverage window.

All coverage windows are subject to local availability. Contact a local HP sales office for detailed information on service availability.

Onsite response time for hardware support

Onsite response time specifies the period of time that begins when the initial service request is received and logged with HP and ends when the HP authorized representative arrives at the Customer’s site within the coverage window. Response times are measured during the coverage window only and may be carried over to the next day for which there exists a coverage window. Response time options available for eligible products are specified in the service-level options table. All response times are subject to local availability. Contact a local HP sales office for detailed information on service availability.

Work to completion

Once an HP authorized representative arrives at the Customer’s site, the representative will continue to deliver the service, either onsite or remotely, at the discretion of HP, until the products are operational or as long as reasonable progress is being made. Work may be temporarily suspended if additional parts or resources are required, but work will resume when they become available.

Work to completion may not apply to onsite support provided for desktop, mobile, and consumer products.

<tr>
<td><strong>Electronic remote monitoring and support, standard configuration</strong></td>
<td>For Customers who meet minimum requirements, electronic remote monitoring and support, standard configuration with real-time remote hardware event management provides diagnostic software for eligible products. This software monitors hardware status and generates notification events when certain predetermined conditions are detected. Notification events are received and forwarded to HP for review and possible support action. With the Customer’s authorization and at the sole discretion of HP, remote network access by an HP support engineer may be used for troubleshooting and faster problem resolution. For details on the minimum requirements, the Customer may contact the local HP sales office.</td>
</tr>
<tr>
<td><strong>Escalation management</strong></td>
<td>HP has established formal escalation procedures to facilitate complex problem resolution. Local HP management coordinates problem escalation, enlisting the skills of appropriate HP resources and/or selected third parties to assist with problem-solving.</td>
</tr>
</tbody>
</table>
| **Access to electronic support information and services** | As part of this service, HP provides access to certain commercially available electronic and Web-based tools. The Customer has access to:  
  • Certain capabilities that are made available to registered users, such as downloading selected HP software and firmware patches, subscribing to hardware-related proactive service notifications, and participating in support forums for solving problems and sharing best practices with other registered users.  
  • Expanded Web-based searches of technical support documents, to facilitate faster problem-solving.  
  • Certain HP proprietary service diagnostic tools with password access.  
  • A support case manager, to submit questions directly to the HP Solution Center. The support case manager helps to resolve problems quickly with a pre-qualification process that routes the support or service request to the engineer qualified to answer the question. The support case manager also allows the status of each support or service request submitted to be viewed, including cases submitted by telephone.  
  • “HP Live”, to check directly with an online HP support engineer during standard HP business hours, 9:30 a.m. to 5:30 p.m. local time excluding HP holidays. This real-time online help can be accessed via the “HP Live” button on selected Web pages. Through sharing browser content, the HP support engineer will help navigate to the appropriate online content that may help resolve the problem. |
Feature | Delivery specifications
--- | ---
Desktop/Workstation/Thin client/Notebook-only coverage | For eligible PC products, the Customer may choose desktop/workstation/thin client/notebook-only coverage. HP Care Pack Services with this coverage do not extend the specified service level to the external monitor or docking station.

Page limits | For eligible printer products, service levels may be offered with page limits. Where page limits apply, the support coverage ends when either the coverage period or the page limit specified in the HP Care Pack has been reached, whichever occurs first.

Accidental damage protection | For eligible products, specific service levels may be offered with accidental damage protection. Where accidental damage protection applies, the Customer receives protection against accidental damage to the covered hardware product as part of this service. Accidental damage is defined as physical damage to a product caused by or resulting from a fortuitous incident. Covered perils include fire, non-intentional liquid spills in or on the unit, drops, falls, collisions, and electrical surge. This includes damaged or broken LCDs (liquid crystal displays), or broken parts. Accidental damage protection does not cover theft, loss, fires, damage caused by a vehicle accident or act of God, normal wear, consumables, intentional acts of damage, or other exclusions, as detailed in the “Coverage” and “Service limitations” section. Major parts or whole unit replacement is subject to certain limitations as detailed in the “Service limitations” section. Major parts replacement, as detailed in the “Service limitations” section, is limited to one each per year. The unit may need to be repaired or replaced at an HP designated location, since not all replacement parts may be available locally.

Coverage

External CRT monitors larger than 17” or external flat panel monitors larger than 15” will not be covered by an HP Care Pack purchased for the main product.

For some servers and storage products, CPUs, disks, and other major internal and external components will be covered if support has been configured accordingly and they are listed in the contract’s equipment list (if applicable).

For HP Care Pack Services with “desktop/workstation/thin client/notebook-only” coverage, external monitors and docking stations will not be covered under this service.

Coverage for eligible multivendor systems includes all standard vendor-supplied internal components and the external monitor, keyboard, and mouse.

Consumable items including, but not limited to, removable media, Power Adapters, batteries and Tablet PC pens, maintenance kits, and other supplies, as well as user maintenance and non-HP devices, are not covered by this service.

For components that are discontinued, an upgrade path may be required. HP will work with the Customer to recommend a replacement.

Not all components will be covered in all countries due to local support capabilities.

For ProLiant servers and storage systems, this service covers HP branded hardware options qualified for the server, purchased at the same time or afterward, internal to the enclosure, as well as 22” and smaller external monitors and tower UPS options up to 3kVA; these items will be covered at the same service level and for the same coverage period as the server. Coverage of UPS battery is not included; standard warranty terms and conditions apply.

For servers or storage systems installed within a rack, service also covers all HP qualified rack options installed within the same rack.

HP Care Pack Services for the HP BladeSystem enclosure include coverage for its patch panels, HP supported Ethernet interconnects, power enclosure with power supplies, and power distribution.

This Accidental Damage Protection (ADP) Service provides coverage against:

1. Accidental damage to the equipment due to unintentional drop or collision
2. Power surge – Physical damage caused by any power surge
3. Liquid spilled in/on equipment

Customer responsibilities

If applicable, the Customer must register the covered hardware and HP Care Pack immediately, as set forth in the HP Care Pack support service agreement.

At the sole discretion of HP, service levels with an onsite response time of 4 hours may require installation of remote connectivity tools and equipment. If remote support is available and required on the covered product, the Customer must provide and allow HP remote access in order to receive an onsite response time of 4 hours.

The Customer will be required, upon HP request, to support the HP remote problem resolution efforts. The Customer will:

• Provide all information necessary for HP to deliver timely and professional remote support and to enable HP to determine the level of support eligibility
• Start self-tests and install and run other diagnostic tools and programs
• Install customer-installable firmware updates and patches
• Perform other reasonable activities to help HP identify or resolve problems, as requested by HP

The Customer is responsible for installing, in a timely manner, critical customer-installable firmware updates, as well as customer-replaceable parts and replacement products delivered to the Customer.

In cases where customer-replaceable parts are shipped to resolve a problem, the Customer is responsible for returning the defective part within a time period designated by HP. In the event HP does not receive the defective part within the designated time period or if the part is physically damaged upon receipt, the Customer will be required to pay a fee for the defective part, as determined by HP.

The customer is responsible for registering to use the HP electronic facility in order to gain access to restricted product information and to receive proactive notification or other services available to the customer.
When making claims under ADP, along with the damaged unit, following documents must be provided to the HP Service Centre:

**Summary of Documents need to be submitted**

<table>
<thead>
<tr>
<th>Perils</th>
<th>Hardware Receipt/Proof of Purchase</th>
<th>Photos of Damaged Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Accidental Damage, Power Surge, Liquid spilled in/out</td>
<td>Required</td>
<td>Required</td>
</tr>
</tbody>
</table>

In the event of any damage which might give rise to a claim under this Agreement you shall:
- Take all reasonable steps to minimize the extent of any damage;
- Preserve damaged parts and make them available for inspection by HP;
- Provide all information and documentary evidence with respect to the claim as HP may reasonably require.
- Upon notification of a claim being given, you must give HP an opportunity to inspect the loss or damage before any repairs or alternations are affected.

1. Hewlett-Packard reserves the right to reject any application if applicant supplies misleading, incomplete information or makes any misrepresentation.
2. If any of the term(s) under the Hewlett-Packard is held by any competent authority to be invalid, such term(s) shall be severed whilst all remaining terms shall remain valid.
3. Hewlett-Packard reserves the final decision in the event of a dispute.

**Service limitations**

At the discretion of HP, service will be provided using a combination of remote diagnosis and support, services delivered onsite, and other service delivery methods. Other service delivery methods may include the delivery via a courier of customer-replaceable parts or whole unit replacement. HP will determine the appropriate delivery method required to provide effective and timely Customer support.

An onsite response time will not apply if the service can be delivered using remote diagnosis, remote support, or other service delivery methods described above.

For fully redundant storage technologies (for example, the XP storage array), the onsite response time applies to critical issues, as reasonably determined by HP, that affect business. Response times for non-critical service requests may vary.

**Exclusions to accidental damage coverage**

Accidental damage protection does not provide coverage for:
- Damage caused by failure to provide manufacturer’s recommended maintenance or operating specifications
- Damage due to war or nuclear incident, terrorism, unauthorized attempts to repair the product, use of damaged or defective media
- Data loss or corruption, business interruptions, obsolescence, cosmetic damage caused due to rust, change in color, texture or finish, wear and tear, gradual deterioration
- Fraud, theft, unexplained or mysterious disappearance, misuse, abuse, or willful act
- Alteration or modification of the product in any way
- Claim/s exceeding the purchase value of the notebook

When HP receives notice on Accidental Damage from the customer, HP will, at its option, repair or replace such parts or replace the whole unit. Whole unit replacement is limited to one replacement per contract year. However, the replacement unit shall not be covered with Accidental Damage protection. The replacement unit shall be with equivalent or higher hardware configuration.

Claim which is fraudulent in any respect, any false declaration made or used in support thereof or any fraudulent means or devices are used by the customer or anyone acting on the customer’s behalf to obtain any benefits under the ADP coverage or if loss or damage be occasioned by the customer’s willful act or with connivance, all benefits under this service shall be forfeited with immediate effect.
Ordering information

Availability of service features and service levels may vary according to local resources and may be restricted to eligible products and geographic locations. To obtain further information or to order HP Hardware Support Onsite Service, contact your local HP sales representative and reference the following product numbers (x denotes the service length in years):

- HA101Ax for next-day response, standard business hours (9x5)
- HA103Ax for 4-hour response, extended business hours (13x5)
- HA104Ax for 4-hour response, 24x7

Depending on the point of purchase, other product numbers may apply. Please consult with your local HP representative or HP reseller on which product number will best meet specific needs.
